PROFESSIONAL SUMMARY

Senior Full Stack Developer with 6+ years of experience architecting and scaling web applications, SaaS platforms, and distributed backend services across E-commerce, Fintech, and GovTech. Deep expertise in TypeScript, React.js, Next.js, Node.js, NestJS, PostgreSQL, Redis, Apache Kafka, gRPC, GraphQL, and AWS S3. Proven track record shipping 100K+ product ingestion pipelines (80% reduction in manual operations), event-driven microservices, real-time trading interfaces with MFA and KYC compliance workflows, and public APIs sustaining 99.9% uptime.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2022+), SQL

Frontend: React.js, Next.js, WebSockets, i18next

Backend: Node.js, NestJS, REST APIs, GraphQL, gRPC, Microservices, Apache Kafka, BullMQ, OAuth2

Databases & Caching: PostgreSQL, Redis

Cloud, DevOps & Architecture: AWS (S3), Datadog, System Design, Distributed Systems, Event-Driven Architecture

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer | TechnoNext Software Limited Dhaka, Bangladesh | Jun 2025 – Present

- Architected a bulk catalog ingestion pipeline processing **100K+ products** via asynchronous BullMQ workers, AWS S3, and validation workflows, achieving an **80% reduction** in manual operations.
- Engineered Apache Kafka event-driven microservices with explicit service boundaries, asynchronous messaging contracts, and fault-tolerant execution across distributed e-commerce systems.
- Built internal gRPC services in NestJS and PostgreSQL powering real-time inventory management, seller validation, voucher processing, and logistics integration.
- Delivered an end-to-end order lifecycle platform integrating third-party logistics APIs, SLA tracking, automated notifications, and live operational monitoring.
- Diagnosed and resolved BullMQ and Redis queue bottlenecks, retry failures, and timeout instability under peak catalog loads, stabilizing job processing reliability and system throughput.
- Developed full-stack seller and admin dashboards using React.js and NestJS to streamline complex order and catalog operations.

Senior Frontend Developer | NEXT Ventures Dhaka, Bangladesh | Aug 2023 – May 2025

- Spearheaded frontend architecture in Next.js and TypeScript for a fintech trading platform supporting live market data, order execution, and compliance-sensitive user operations.
- Engineered WebSocket-driven market and portfolio dashboards for high-frequency activity, minimizing unnecessary UI re-renders via React memoization and structured state isolation.
- Architected scalable client state management synchronizing authentication, trader onboarding, trading operations, and real-time portfolio balances.
- Implemented TOTP-based multi-factor authentication, device fingerprinting, and KYC/AML onboarding flows using Sumsub OCR verification to reduce unauthorized access incidents and improve verification efficiency.
- Delivered multilingual platform support across **5+ languages** with Next.js and i18next, establishing reusable UI components and modular dashboard layouts.

Backend Developer (Node.js) | Dorik AI Sylhet, Bangladesh | Jun 2022 – Jul 2023

- Designed and maintained a public-facing GraphQL API platform powering Zapier, Notion, and Google Docs integrations across thousands of daily developer requests.
- Cut third-party partner integration time by **40%** through cleaner GraphQL schema design, structured developer documentation, and consistent error contracts.
- Implemented OAuth2 authentication, token-based rate limiting, and resilient error handling to safeguard high-concurrency API traffic.
- Integrated Airtable as a headless CMS backend, lowering internal content operations workload by **20%**.
- Instrumented Datadog metrics, traces, and alerting across production services, sustaining **99.9% API uptime**.

Frontend Developer | Penta Global Limited Dhaka, Bangladesh | Apr 2019 – May 2022

- Built core frontend modules in React.js for a government-backed digital investment platform, contributing to a **23% increase** in regional investment registrations.
- Developed a QR-code digital certificate issuance and verification system, cutting manual certificate processing time by **30%**.
- Migrated **30+ legacy Laravel views** to modular React.js components while preserving REST API compatibility and data integrity.

EDUCATION

Bachelor of Science (BSc) | National University Bangladesh Dhaka, Bangladesh | 2015 – 2020
